

SAMSUNG

Digital Phones 5000 Series

Communicate in style

With true voice and data convergence a reality you can now stay in contact wherever you go. Samsung's range of handsets and other User-End-Points offer a wide variety ergonomically designed terminals, suitable for use in the office, at home or in any wireless-enabled location, such as a hotel or other office. Stylish and

easy-to use, each handset is designed to maximise the benefits of the system's functionality - and to give users the appropriate feature set and access levels for their individual needs. Whether that is a simple telephone, Wireless, Softphone or a fully-featured handset with LCD display and programmable functions.

Selected Samsung handsets are available in digital or analogue configurations, providing identical features and functionality to the user. That means that users have indistinguishable functionality and access to the system, whether they are connected as traditional keysets or remotely via external data connection, such as DSL.

As technology advances, you can be sure that Samsung will be at the leading edge of the revolution, keeping your business ahead of the game.

Innovation on the desktop

By integrating Samsung's state-of-the-art communications technology into the 5000 series handsets, your desktop can now become a multi-functioning, converged workstation.

Flexibility to Expand or Change

The OfficeServ 7000 series provides on-going flexibility to meet the needs of future expansion, moves and changes. Adding more phones or moving people around to new extensions is all quick and easy whether that's within the office, at another office, away from the office or while working from home. The application of Digital technologies means Samsung can truly unite communications within any organisation across LANs, WANs and the Internet. With shared features and functionality plus a common look and feel to every terminal.

Think Smart. Think Samsung.

Digital Phones

5000 Series

Simple and Stylish

Samsung 5000 series display handsets feature a 32-character, 2 line scrollable LCD screen to display call information like Calling Line Identification (CLI, who is calling) and Direct Dialing Inward (DDI, which may indicate why they are calling). The LCD also helps the users navigate effortlessly through the systems features.

In addition, display handsets incorporate programmable soft keys with tri-coloured LED status indicators that can be used for speed dialling, as well as one-touch feature access keys and traditional 'Key & Lamp' working.

Optional add-on modules can also be assigned to compatible handsets, creating 64 additional soft keys. Or you can choose Samsung's standard Digital and Analogue handsets, as a cost-effective alternative for staff who do not require high access to system features. Ensuring everyone has their own point of contact and individual extension.
